

REMARKS

In response to the Notice of Incomplete Reply dated September 7, 2004, the Patent Office deemed the application as informal since it did not comply with drawing regulations 37 CFR 1.84 and 37 CFR 1.121. Applicants' representative has amended the above-identified specification to correctly identify the drawings in question. Specifically, the specification has been amended to clearly identify Fig. 20, as correctly presented.

Applicants' representative has also canceled the claims previously filed and presents herewith new claims that more clearly claim the invention.

The application is clearly in order for examination.

Respectfully submitted,

Wolf Kohn and Anil Nerode
